

What Is Early Literacy?

Early literacy is what children know about reading and writing before they can actually read and write.

Babies are able to process language as soon as they are born. They should be exposed to reading as soon as possible because it helps them build their understanding of the language and helps them develop early literacy skills.

Early literacy helps children:

- Build vocabulary.
- Tell stories.
- Understand letter-sound connections.
- Develop a love of literacy.

Why Is Sharing A Book With My Baby Important?

Literacy achievement is directly related to language exposure in newborns and young children. Reading is the most beneficial form of language exposure.

It strengthens your baby's ability to trust, respond to emotion and understand the world around him\her while building self-esteem. It is also the perfect occasion to bond with your baby and create a special one-on-one time.

Mary Had A Little Lamb

Mary had a little lamb, whose fleece was white as snow.

And everywhere that Mary went, the lamb was sure to go.

It followed her to school one day which was against the rules.

It made the children laugh and play, to see a lamb at school.

And so the teacher turned it out, but still it lingered near,

And waited patiently about, till Mary did appear.
